AWARDED CATEGORY

Category C

Mission-Based ITC/AV Service Solutions

Who can use SEWP? NASA SEWP provides federal agencies and their authorized contractors access to in-scope information technology, communications, and audio-visual solutions and services. Redd Solutions' Category C award is for mission-based ITC/AV services. Quoted offerings must be available under our contract.

ABOUT REDD SOLUTIONS

Technology, people, and mission delivery.

Redd Solutions, LLC helps government organizations modernize operations with Microsoft technologies, applications, automation, data, and mission-focused professional services. Our team pairs technical and program expertise with responsive delivery to help agencies address complex requirements. Our broader corporate capabilities extend beyond the offerings currently available under our NASA SEWP VI Category C contract; the applicable contract record and order terms govern purchases through SEWP.

Federal delivery experience. We bring experience in government technology modernization and professional services to each engagement.

What sets us apart

Integrated expertise

Technology delivery, program management, and professional services within one team.

Federal experience

Experience working with government stakeholders, delivery requirements, and mission priorities.

Responsive leadership

Named program contacts for SEWP VI inquiries, quotes, order status, and issue escalation.

Small business access

Total Small Business, SBA 8(a), EDWOSB, and WOSB designations.

PROGRAM SUPPORT

Start with the right quote.

For mission-based ITC/AV services available under Redd Solutions' Category C award, contact the team below and use the NASA SEWP quote request process applicable to your agency.

01 Identify the requirement

Determine the requested services, scope, place of performance, deliverables, and desired schedule. Your agency controls its own purchase request and funding process.

02 Request a SEWP quote

Use the SEWP online Quote Request Tool when appropriate for market research and fair opportunity. Redd Solutions can be contacted for questions about our contract and available offerings.

03 Review the response

Confirm the quoted services are available on Redd Solutions' contract, along with the stated price, terms, validity period, and applicable order-level requirements. Future offerings may be quoted only after they are available under the contract.

04 Issue the order through your agency

The authorized agency contracting office issues its delivery or task order under its own procedures. Submit the order through the applicable SEWP PMO process.

BUYER REFERENCE

How SEWP ordering works.

The NASA Solutions for Enterprise-Wide Procurement (SEWP) VI program is a multiple-award Government-Wide Acquisition Contract (GWAC). Orders must align with the scope of the selected Contract Holder's award and the issuing agency's procurement rules.

Fair opportunity

For orders under a multiple-award contract, the ordering contracting officer provides fair opportunity as appropriate under FAR 16.505(b) and the governing SEWP contract. SEWP's quote request tools can support the process. The issuing procurement office maintains its order selection documentation.

Who issues the order? The issuing agency, through its contracting office, issues its purchase request and delivery or task order using its applicable forms and procedures. The NASA SEWP Program Management Office does not issue an agency's orders; it processes and tracks orders issued under the program.

Redd Solutions' Category C scope

Mission-Based ITC/AV Service Solutions

Redd Solutions holds a Category C award. A service, product, or associated solution may be quoted under Contract 80TECH26D0752 only when it is within the contract's scope and available in the applicable SEWP contract record. Ask our program team about a specific requirement before issuing a request.

Our broader corporate capabilities may include offerings that are not yet available for purchase under this SEWP contract. The contract record and order terms control what may be quoted.

Order changes and scope questions

Route delivery or task order modifications through the SEWP PMO process. For questions about whether a requirement is within SEWP scope, contact the SEWP help desk at help@sewp.nasa.gov.

AFTER THE ORDER

Support through delivery.

For delivery, performance, installation, basic or extended warranty, technical support, software support, or an order problem, contact Syreeta Johnson or Donshay Privott with Contract 80TECH26D0752 and the applicable order number. We will check the order terms, identify the responsible delivery or provider team, and coordinate the next step.

Services and technical support

Report the affected deliverable or service, the observed issue, and the order number. We will review the applicable statement of work and support terms, coordinate with the assigned team, and advise the ordering office of the proposed resolution.

Installation and warranty

Installation and basic or extended warranty apply only where expressly included in the awarded order or an applicable product or provider term. We will identify the responsible provider, help initiate the applicable support process, and coordinate with the ordering office.

Problematic order or modification: Contact either program manager with the order number and a concise description of the discrepancy, delay, or requested change. We will review the order record, identify the responsible party, and coordinate with the ordering contracting office and SEWP PMO as applicable. Any order modification must follow the agency and SEWP PMO process.
